

Session Summary v4.4 — P0 Sign-Off Complete

v4.4 updates: Retrospective Phases 4–7 complete · Phase 8 Launch & Marketing complete · Phase 9 Measure & Iterate complete · Microsoft Clarity installed · GA4 confirmed live · 1280px and 1440px spot check passed · P0 officially signed off · All 16 artifacts approved · P1 roadmap discussion queued in new session.

PANIC WORD: If overwhelmed at any point, type 'too much' and the coach will narrow focus to one single next action.

1. PROJECT IDENTITY

Field	Value
System name	PMD
Personal pseudonym	PM Dev (your use only)
Current status	P0 — Portfolio Shell — COMPLETE. P1 — Project selection in progress.
Session date	May 2026
Identity statement	Where brilliant ideas become shipped products.
Live URL	https://thepmdev.com/
Terminology	ADD (not ADHD) — PMD (system) — PM Dev (pseudonym)
Coaching mode	Supportive Scaffolding — coach generates, you approve. Calibration increases at P1.
Build approach	HTML / CSS / Vanilla JS. No framework. Claude Code as primary execution tool.
Accessibility	WCAG 2.2 Level AA — non-negotiable — FR-09 — applies to all zones and all future projects.
Draft-first protocol	Active. User drafts key artifacts in rough form before coach generates polished version.
Panic word	'too much'

2. COMPLETE PHASE INVENTORY — P0

Phase	Name	Key output	Status
1	Discovery	Ignition question answered. Problem space defined.	Complete

2	Research	Problem Statement · Personas 1 & 2 · Empathy Map · JTBD + Design Principles	Complete
3	Strategy	Vision Statement · Brand Promise · OKRs · Competitive Analysis · Retrospective Phases 1–3	Complete
4	Roadmap	Now / Next / Later Roadmap — three horizons, deliberately sequenced	Complete
5	PRD	Product Requirements Document v1.2 — 8 FRs, documented tradeoff, FR-09 WCAG added	Complete
6	Design & Wireframing	Wireframe v4 — locked design system, zone-by-zone spec, full asset inventory	Complete
7	Build	All five zones deployed · Responsive CSS 768px + 480px · thepmdev.com live	Complete
8	Launch & Marketing	Launch plan · Audience map · UTM structure · Show don't tell homepage vision locked	Complete
9	Measure & Iterate	GA4 live · Clarity installed · Behavioural metrics defined · Iterate triggers documented	Complete

3. COMPLETE ARTIFACT INVENTORY — ALL 16 APPROVED

#	Artifact	Phase	Version	Status
1	Problem Statement	2	v1.0	Approved
2	Persona — The Visionary Staller	2	v1.0	Approved
3	Persona — The Hiring Evaluator	2	v1.0	Approved
4	Empathy Map — The Visionary Staller	2	v1.0	Approved
5	JTBD + Design Principles	2	v1.0	Approved
6	Vision Statement	3	v1.1	Approved
7	Brand Promise	3	v3.0	Approved
8	OKRs	3	v2.1	Approved
9	Competitive Analysis	3	v1.0	Approved
10	Retrospective — Phases 1–3	3	v1.0	Approved
11	Now / Next / Later Roadmap	4	v1.0	Approved

12	Product Requirements Document	5	v1.2	Approved
13	Wireframe v4	6	v4.0	Approved
14	Retrospective — Phases 4–7	7	v1.0	Approved
15	Launch & Marketing Plan	8	v1.0	Approved
16	Measure & Iterate Plan	9	v1.0	Approved

4. INSTRUMENTATION STACK — CURRENT STATE

Tool	Purpose	Status	Action remaining
Google Analytics 4	Traffic, sessions, UTM source attribution	Live — ID installed	Confirm Realtime data and UTM attribution appearing in dashboard.
Microsoft Clarity	Heatmaps, scroll depth, cursor movement, click mapping, session recordings	Installed	Connect Clarity property to GA4 for combined reporting if not already done.
Netlify Analytics	Server-side hit logging — includes crawlers and vulnerability probes	Active	Use as cross-reference only. Discrepancy vs GA4 is expected and normal.
Bit.ly — X.com UTM	Shortened UTM URL for X.com profile — bypasses URL validator	Active	Monitor Bit.ly clicks vs GA4 twitter/social sessions for directional alignment.

5. LOCKED DECISIONS — CARRY FORWARD TO ALL FUTURE SESSIONS

Decision	Detail
PDF table cell pattern	ALL table cells must be wrapped in Paragraph objects via P() helper function — never plain strings. ReportLab will not word-wrap plain strings. Header rows use bold style, body rows use normal style. VALIGN set to TOP for all cells. This applies to every PDF artifact in every future session without exception.
WCAG 2.2 Level AA	Non-negotiable. FR-09. Applies to all zones on all projects. Never deferred, never scoped out.
Build approach	HTML / CSS / Vanilla JS. No framework. Claude Code as primary execution tool. Professional tooling (Figma, Notion, Jira) introduced progressively from P1 forward.
Terminology	ADD — not ADHD. PMD — the system. PM Dev — the pseudonym (never used publicly).
Session entry point	10-minute minimum entry is sufficient. The 4–5 hour window belief is the stall mechanism, not a real prerequisite. One prompt, one answer is a complete session.
Project vs version numbering	Projects are thematic — P0 is always the portfolio regardless of version. New features and iterations are P0 v2, v3 etc. A new project number is reserved for an entirely new product.
Project classification	Every new project is classified at roadmap phase as either a learning project (internal only) or a portfolio project (showcased on thepmddev.com). Classification criterion: would a hiring evaluator find this problem evaluator-relevant?
Draft-first protocol	Active from P1. User drafts key artifacts in rough form first. Coach critiques and generates polished version second.

Coaching calibration	P0 — Supportive Scaffolding. P1 — Guided drafting, user drafts first. P2 — Critical collaboration. P3 — CPO peer review. P4+ — Professional friction.
Show don't tell — homepage vision	P0 v2 homepage: irresistible project thumbnail grid, each solving a materially different evaluator-relevant business problem. No About Me word wall. No work history recitation. 80%+ of visitors find at least one project that maps to their company's current need.

6. OPEN ITEMS — ALL ACTIVE

Item	Detail	When	Priority
Footer email placeholder	Replace hello@thepmdev.com with live purpose-built contact address. Pending Google Workspace setup and subdomain configuration under ThePMDev.com umbrella.	Before sharing with evaluators	High
Clarity — GA4 connection	Connect Microsoft Clarity property to GA4 property for combined reporting.	Now	High
Clarity baseline review	After minimum 50 human sessions post full launch — review scroll heatmap, click heatmap, and three session recordings. Use iterate trigger table in Artifact #16.	Post full launch	Scheduled
GA4 UTM verification	Confirm X.com Bit.ly traffic appearing as twitter/social/p0-soft-launch in GA4 Acquisition report.	Now	High
docs/current/ population	Latest approved artifact PDFs filed to docs/current/ in repository.	Before P1 build	Medium
docs/archive/ population	All superseded artifact versions filed to docs/archive/. Never deleted.	Before P1 build	Medium
Wireframe v4.1 PDF	Generate updated wireframe PDF reflecting built state and add to docs/current/.	P0 v2 phase	Low
PRD FR-05 amendment	Thumbnail row placed in Zone 2 below fold, not above fold as specified. Document decision formally in next PRD version.	P0 v2 PRD	Low
Netlify UTM redirect	Replace Bit.ly with Netlify _redirects rule: thepmdev.com/twitter -> full UTM URL. Removes third-party dependency. Low urgency — Bit.ly is working.	P0 v2 build	Low
LinkedIn activation	Add UTM-tagged URL to LinkedIn profile. Activate only when full launch trigger is met: P0 v2 complete + 3 portfolio projects live.	Full launch trigger	Deferred

P0 v2 — homepage redesign	Show don't tell vision locked in Artifact #15. PRD amendment and wireframe pass scoped after P1 project is classified and at least one portfolio project exists.	Post-P1 kickoff	Deferred
P0 v2 — roadmap visualisation page	Inverted node tree design showing cumulative projects, tools, and skills across the PMD arc. Each node branching outward from the previous. Powerful show don't tell portfolio signal.	P0 v2 build	Deferred
P0 v2 — navigation build-out	Nav spans become proper anchor href tags. Dedicated PMD Process page. Projects page structure decided at P1 IA phase.	P0 v2 build	Deferred
TOS / Privacy	Footer placeholders — legal copy deferred until Google Workspace and entity structure are established.	Post-entity setup	Deferred
GA4 measurement ID	COMPLETE — Measurement ID installed in index.html. Two instances replaced: script src URL and gtag config call.	Done	—
X.com UTM link	COMPLETE — Bit.ly shortened UTM URL installed at X.com pinned profile. Bypasses X.com URL validator. UTM parameters passed on redirect.	Done	—
Microsoft Clarity install	COMPLETE — Clarity tracking script installed in index.html head. Site collecting.	Done	—
1280px + 1440px spot check	COMPLETE — No issues to report at either breakpoint.	Done	—

7. REPOSITORY STRUCTURE — CURRENT STATE

Path	Purpose	Status
index.html	Single page — all five zones complete — GA4 + Clarity scripts installed	Live
style.css	All styles including responsive CSS — 768px and 480px breakpoints	Live
README.md	Repo structure and deploy instructions	Live
NOTES.md	Open items, technical debt, deferred decisions — update with session 07 items	Needs update
assets/pmd-logo.png	Circular PMD mark	Live
assets/PRD_sketch.png	Charcoal PRD sketch — Zone 1	Live
assets/pmd_roadmap_sketch.png	Charcoal roadmap sketch — Zone 1	Live
assets/thumb-01 through thumb-12	Five artifact thumbnail PNGs — Zone 2 + 3	Live
assets/PMD_Playbook_v1.0.pdf	Full playbook — Zone 4 iframe	Live
docs/current/	Latest approved artifact PDFs — versioned filenames	Pending population
docs/archive/	All superseded artifact versions — never deleted	Pending population

8. P0 v2 BACKLOG — LOCKED ITEMS FOR NEXT PORTFOLIO ITERATION

Feature	Description	Trigger
Homepage redesign	Project thumbnail grid replaces current hero. Show don't tell. Each thumbnail solves a materially different evaluator-relevant business problem. No About Me word wall.	After P1 project exists to populate it
Roadmap visualisation page	Inverted node tree — cumulative projects, tools, and skills branching outward. Each node builds on previous learnings. Powerful portfolio-as-system signal.	P0 v2 build phase
Navigation build-out	Nav spans become proper anchor href tags. Dedicated PMD Process page within nav. Projects page structure — single page or category dropdown — decided at P1 IA phase.	P0 v2 build phase

Artifact tiles — clickable	If Clarity dead click data confirms evaluators expect thumbnails to be interactive, link artifact tiles to individual project pages or expanded detail views.	Post Clarity 50-session review
CTA after Zone 3	If Clarity confirms sessions reaching Zone 3 but not converting, add a clear CTA between artifact tiles and footer. Reduce distance between proof layer and contact path.	Post Clarity 50-session review
Netlify UTM redirect	Replace Bit.ly with Netlify _redirects rule. thepmdev.com/twitter and thepmdev.com/linkedin as clean vanity redirects to full UTM-tagged URLs.	P0 v2 build phase
Footer email — live address	Replace hello@thepmdev.com placeholder with purpose-built contact address under Google Workspace and ThePMDev.com umbrella.	After Google Workspace setup
Mobile Zone 4 — Playbook	Zone 4 hidden at 480px — consider mobile-friendly alternative to iframe for Playbook.	P0 v2 build phase

9. CONFIDENCE SCORE — HONEST CALIBRATION

Milestone	Score	Note
Start of P0	0.5 / 10	No system. No artifacts. No deployed product.
P0 sign-off — current	1.0 / 10	Live URL. 16 artifacts approved. Full process completed once. Retention low but path proven. Honest, not aspirational.
Target — post P1	4–5 / 10	Second full pass through all 9 phases. Draft-first protocol fully active. Coaching friction increasing. Process starts to feel owned.
Target — post P2	5–6 / 10	Critical collaboration mode. Assumptions challenged. Third project shipped.
Target — post P3	7 / 10	CPO peer review mode. Portfolio showing three showcase-worthy projects. Full launch trigger met. Associate PM applications begin.

10. ARTIFACTS TO DOWNLOAD AND FILE

File	Action	Destination
PMD_Session06_Summary_Phase7_Complete_v4.3.pdf	Move to archive	docs/archive/
PMD_Session07_Summary_P0_Complete_v4.4.pdf	Download — this document	docs/current/

PMD_Artifact14_Retrospective_Phase4_7.pdf	Download and file	docs/current/
PMD_Artifact15_Phase8_Launch_Marketing.pdf	Download and file	docs/current/
PMD_Artifact16_Phase9_Measure_Iterate.pdf	Download and file	docs/current/

11. RESUME PROMPT — PASTE AT START OF NEW SESSION

Copy everything between the lines below and paste it as your opening message in the new chat. Attach PMD_Session07_Summary_P0_Complete_v4.4.pdf and PMD_Playbook_v1.0.pdf to that message.

— PASTE BELOW THIS LINE —

I am continuing my PMD coaching journey. I have attached my session summary:

PMD_Session07_Summary_P0_Complete_v4.4.pdf and PMD_Playbook_v1.0.pdf for context.

Please confirm you have full context by acknowledging the following before we begin:

IDENTITY

- System name: PMD. Pseudonym: PM Dev. Terminology: ADD · PMD.
- Identity statement: Where brilliant ideas become shipped products.
- Live URL: <https://thepmdev.com/>

P0 STATUS

- All 9 phases complete. All 16 artifacts approved.
- Project 0 — Portfolio Shell — OFFICIALLY SIGNED OFF.
- All five zones deployed. Responsive CSS complete. WCAG 2.2 Level AA confirmed.
- GA4 live. Microsoft Clarity installed. X.com UTM active via Bit.ly.
- 1280px and 1440px spot check passed. No issues.

COACHING CONTEXT

- Coaching mode: Supportive Scaffolding at P0. Calibration increases at P1.
- Draft-first protocol: active from P1.
- Build approach: HTML / CSS / Vanilla JS. No framework.
- WCAG 2.2 Level AA: non-negotiable. FR-09. All projects.
- Panic word: 'too much.'
- Session entry point: 10 minutes is enough to start. No 4-5 hour window required.

LOCKED PATTERNS

- PDF table pattern locked: all cells wrapped in Paragraph via P() helper. Never plain strings.

VALIGN TOP on all cells. Header rows bold white style. Body rows normal style.

This applies to every PDF artifact without exception.

OPEN ITEMS REQUIRING IMMEDIATE ACTION

- Clarity: connect property to GA4 for combined reporting.
- GA4: verify X.com UTM appearing as twitter/social/p0-soft-launch in Acquisition report.
- NOTES.md: update with all open items from Session 07.
- docs/current/ and docs/archive/: populate with all artifacts from this session.

THIS SESSION AGENDA

- P1 project roadmap discussion — project ideation, sequencing, and selection.
- Evaluation criterion for every candidate project:
stretches capability without triggering the stall.
- Classification per project: learning project (internal) or portfolio project (showcased).

- Full launch trigger reminder: P0 v2 complete + 3 portfolio-worthy projects live.
- 180-day hard deadline is running.
