

PMD

Session Summary & Handoff Document

April 2026 · v2.0 · Phases 1–4 Complete · Phase 5 Ready

PANIC WORD: If overwhelmed at any point, type **"too much"** and the coach will narrow focus to one single next action.

Purpose of This Document

This document enables PMD coaching sessions to resume instantly in a new conversation without loss of context. Paste this document at the start of a new Claude session to restore full project state. It also serves as the seed content for the PMD Playbook Google Doc.

1. Project Identity

- System name:** PMD (formerly PM Dev)
- Personal pseudonym:** PM Dev (your use only — the system is always PMD)
- Current phase:** Phase 5 — PRD Development
- Active project:** Project 0 — Portfolio Shell
- Session date:** April 2026
- Identity statement:** Where brilliant ideas become shipped products.

Project Map

Project 0 Portfolio shell — live at public URL in ≤10 days w/ Claude Code	Project 1 Word game — ≤90 days. First true PMD test.	Project 2 TBD — begins within 7 days of P1 finish	Project N Living system — compounds with each project
---	--	---	---

2. PMD — What It Is

Vision Statement

"A world where the gap between a brilliant idea and a shipped product is no longer determined by neurological wiring — where anyone who thinks in systems and leads with creativity has a process designed for the way their mind actually works."

Brand Promise v3.0 (Approved)

- "You think in explosions — magnificent, cascading — and you can already see the solution: every feature, every user, every edge case."
- "You have the vision."

"What you need is a system fast enough to keep up with you, to capture it all, yet robust enough to turn that vision into reality and rigorous enough to show you exactly what to do next."

"PMD is that system. It holds the complexity so you maintain focus. It closes the gap between the idea in your head and a shipped product in the world — comprehensively, professionally, at your speed. Nothing missed. Nothing left behind."

"Sounds too good to be true? Trust yourself. The portfolio you build will prove it."

The Jarvis Principle

PMD is Jarvis. You are Tony Stark. The system holds the complexity, the map, and the next step — so you stay in the genius zone. The agency, the vision, and the execution are always yours.

3. The User — Primary Persona

"The Visionary Staller"

CPA / MBA — Aspiring PM — ADD Systems Thinker — Chronically underemployed — Financially constrained

"I can see the entire product in my head in seconds — fully formed, every feature, every user. Then I open a blank doc and I can't begin."

Core Pain Points

- Idea-to-execution gap — vision never becomes shipped product
- Activation energy paralysis — can't start even when motivated
- Scope flood overwhelm — too many ideas hit simultaneously
- Fear of judgment — 'all hat, no cattle' imposter syndrome
- Unknown unknowns anxiety — panic at everything I don't know
- Shame from incompletion — lifelong loop of unfinished projects

Cognitive Strengths

- Systems thinker — sees patterns and connections instinctively
- Strong UX intuition — empathy-first product thinking
- Business fluency — CPA + MBA analytical foundation
- Burst ideation — sees the whole product in seconds
- Puzzle motivation — irresistibly engaged by unsolved problems
- Learning hunger — craves deep knowledge across domains

The Loop That Breaks Every Project

1. Ignition Dopamine rush, creative flood, everything at once	2. Overwhelm Can't capture fast enough, momentum fades	3. Stall No clear step 1, blank page panic, withdrawal
---	--	--

The Ignition Prompt

"[Entity] is having an issue with [problem]. How would you solve it?"

Triggers intrinsic motivation through puzzle-framing. Bypasses activation paralysis. The answer seeds every artifact that follows.

4. PMD Design Principles

1 One prompt, one answer, one step

Never show more than one question or task at a time. The next step only appears after the current one is complete.

2 Capture first, organize later

During the burst moment, the system accepts raw unstructured input and structures it quietly in the background.

3 Visible progress over hidden work

Every completed step produces a visible artifact — named, versioned, dated. Proof of movement, not just activity.

4 Progressive disclosure of scope

The full project roadmap exists but is never shown all at once. Complexity is revealed only when the user is ready.

5 AI holds the map

The user never has to remember where they are, what comes next, or what they've forgotten. The system carries all cognitive load.

6 Time is not infinite — sessions must be timboxed

Every prompt should take no more than 15 minutes. The system must be resumable from exactly where it left off — no re-orientation tax.

Re-entry Design Spec

Condition	What works	What fails
Cold start	Intellectual provocation	Blank page, open scope
Warm re-entry	Tantalizing question about what's possible	Task list, progress reminders
Shutdown trigger	—	Wall of tasks, juvenile gamification
Flow trigger	Puzzle, banter, creative challenge	—
Ideal arc	Think → create → momentum → practical	Administrate → document → comply

5. Artifact Inventory — Phases 1–4

#	Artifact	Status	Phase
#1	Problem Statement — PMD v1.0	Approved	Phase 1
#2	Primary Persona — The Visionary Staller	Approved	Phase 2
#3	Secondary Persona — The Hiring Evaluator	Approved	Phase 2

#4	Empathy Map — Persona #1	Approved	Phase 2
#5	Jobs-to-be-Done + 6 Design Principles	Approved	Phase 2
#6	Vision Statement	Approved	Phase 3
#7	Brand Promise v3.0	Approved	Phase 3
#8	OKRs v2.1 — 3 Objectives, 10 Key Results	Approved	Phase 3
#9	Competitive Analysis	Approved	Phase 3
#10	Retrospective — Phases 1–3	Approved	Phase 3
#11	Now / Next / Later Roadmap v1.0	Approved	Phase 4

All 11 artifact PDFs stored in PMD Playbook — Living Document. Both PDF archive and editable Google Doc maintained from Phase 5 forward.

6. OKRs Summary — v2.1 Approved

O1 — Personal Growth	P0: ≤10 days · P1: ≤90 days	Prove execution is possible — and feel it.
KR1		Project 0 live ≤10 days. Project 1 shipped ≤90 days.
KR2		All 9 phases completed with artifacts for P0 and P1.
KR3		Self-reported confidence reaches 5/10 by end of P1.
O2 — Product	90-day cycle	Portfolio earns 'executive-level insights' from evaluators.
KR1		P1 fully showcased with PM + business/analytical artifacts.
KR2		3 companies invite me for associate/junior PM interviews.
KR3		Site traffic/usage metrics visualized as a living portfolio artifact.
O3 — System	Living — no expiry	PMD is repeatable, adaptive, and compounds with every project.
KR1		PMD Playbook exists and fully documents Project 0.
KR2		Project n begins within 7 days of finishing Project n-1.
KR3		Zero phases skipped on Project n. Rigor is non-negotiable.
KR4		Retrospective documented after every project. Improvements incorporated before n+1.

7. Now / Next / Later Roadmap — Artifact #11

NOW	NEXT	LATER
-----	------	-------

01 Re-entry ignition Commitment live. P0 is the active project. The catalyst has fired.	01 Full-stack PM identity lands in 5 seconds Business fluency + technical fluency. Visitor knows immediately.	01 PMD proves itself Multiple shipped projects demonstrate the system adapts, grows, and scales with the user.
02 Project 0 live at a public URL Deployed, accessible, shareable. Not mostly done. Live.	02 Marketing layer Anticipates Hiring Evaluator's checklist. CTAs lure to proof.	02 Project backlog prioritization framework Goldilocks sequencing — each project stretches capability without triggering the stall.
03 PMD Playbook repository exists All approved artifacts stored, versioned, and accessible. Single source of truth.	03 Proof layer architecture Mock content in P0. Real deliverables swapped in from P1 forward.	
	04 Conversion layer One-click contact, targeted sharing, curated links. Frictionless path to outreach.	

8. Where We Left Off — Resume Here

Phase Status

Phases 1–4: Complete. All artifacts approved.

Phase 5: PRD Development — ready to begin

Last Socratic prompt: #14 — completed. Phase 5 begins at Socratic Prompt #15.

PMD Playbook: Google Doc must exist before Phase 5 begins (O3-KR1)

Phase 5 Preview — PRD Development

Phase 5 builds the Product Requirements Document for Project 0. This is the most artifact-dense phase in PMD. Draft-first protocol activates here.

Draft-first protocol activates at Phase 5

- User drafts key artifact sections in rough form before coach generates polished version
- Builds real synthesis skill — not just approval muscle
- Coaching mode remains Supportive Scaffolding — but the reps begin here

Artifact Format Going Forward

- Every new artifact generated as both PDF (archive) and paste-ready text block (Google Doc)
- PDF matches existing Artifact #1–11 format
- Text block formatted for direct paste into PMD Playbook Google Doc

9. Coaching Mode

Project	Mode	Status	What changes	Feedback %
P0 · Portfolio	Supportive scaffolding	ACTIVE	Coach generates, user approves, coach explains why	15%
P1 · Word game	Guided drafting		User drafts first on key artifacts, coach critiques	35%
P2 · TBD	Critical collaboration		Coach challenges assumptions, pushes back on weak reasoning	55%
P3 · TBD	CPO peer review mode		Coach responds as a CPO reviewing a PM's work	75%
P4+ · TBD	Professional friction		Open disagreement, user defends decisions with evidence	95%

10. Open Questions — To Resolve in Phase 5+

What does the portfolio site actually look like visually?

Target: Phase 5 PRD

What tech stack serves Project 0 best for a solo builder using Claude Code?

Target: Phase 5

When does the user draft vs. approve artifacts?

Resolved: Draft-first begins at Phase 5 PRD

What is the word game's core mechanic exactly?

Target: Project 1 kickoff

How does PMD eventually become a software product vs. a Claude workflow?

Strategic — Phase 4 roadmap decision pending

11. Terminology & Naming Conventions

- ADD — not ADHD. All references use ADD.
- PMD — the system name. PM Dev — your personal pseudonym only.
- Project 0 — portfolio shell. Project 1 — word game. Project N — living system.
- Jarvis — the system. Tony Stark — you.

12. How to Resume in a New Session

Copy the prompt below and paste it at the start of your next Claude session. Attach this PDF. Phase 5 will ignite immediately.

PMD Phase 5 — Resume Prompt

I am continuing my PMD coaching journey. I have attached my session summary document:
PMD_Session_Summary_Phase5_Handoff.pdf

Please confirm you have full context by acknowledging the following before we begin:

- System name: PMD. My personal pseudonym: PM Dev.
- Phases 1–4 complete. All 11 artifacts approved.
- Active project: Project 0 — Portfolio Shell.
- Current phase: Phase 5 — PRD Development.
- Coaching mode: Supportive Scaffolding. Coach generates, I approve.
- Draft-first protocol activates this phase — I write rough drafts on key sections before you generate the polished version.
- Terminology: ADD (not ADHD), PMD (not PM Dev for the system).
- Panic word: "too much."
- Next action: Begin Phase 5 PRD Development for Project 0. Start with the ignition prompt, not a task list. Challenge me to think first.
- Last Socratic prompt completed: #14. Phase 5 begins at Socratic Prompt #15.

Once confirmed, ignite Phase 5.
