

PMD · Session Summary · Session 09

v1.0 · May 2026 · Six System Additions Complete · Session 10 Pre-P1 Context Session Next

1 · Project Identity

Field	Value
System name	PMD
Pseudonym	PM Dev (personal use only — never public)
Identity statement	Where brilliant ideas become shipped products.
Live URL	https://thepmdev.com/
Terminology	ADD · PMD · PM Dev
Current status	P0 complete · All six system additions complete · Session 10 context session queued before P1 kickoff
Session date	May 2026
Build approach	HTML/CSS/Vanilla JS → React → Full-stack. Claude Code as primary execution tool.
Accessibility	WCAG 2.2 Level AA — non-negotiable — FR-09 — all projects
Draft-first	Active from P1. User drafts first. Coach critiques second.
Coaching mode	Supportive Scaffolding at P0 → Guided Drafting at P1 → escalating per phase
Language	American English — enforced across all documentation and artifacts from Session 09

2 · Session 09 — Work Completed

Final pre-P1 system build session. All six system additions from Session 08 completed. Four new artifacts produced. Two locked standards updated. Session 10 queued as a context and strategy session before P1 Kickoff fires.

Work Item	Summary	Status
-----------	---------	--------

Artifact #23 v1.1 — Sentiment Journey Diary	v1.0 produced and immediately revised to v1.1 after coach review. Six schema corrections: peak_valley removed (terrain derived from confidence_score); exceeded_expectations + fell_short consolidated into self_assessment{}; content_log_items and next_project_intent promoted to required; duration field added; horizon[] array added for forward-looking runway; showcase_rationale renamed to showcase_note. Hiker-path infographic spec. Narrow + wide zoom modes. PDF/PNG priority. React component scoped.	Complete — v1.1 approved
PMD_DECISION_LOG.md	System Decision Log created at repo root. Six categories: Governance, Roadmap & Sequencing, Coaching Calibration, Tooling & Architecture, Content Strategy, Artifact & Schema. 19 founding entries seeded from P0 and Sessions 01–09. Cross-reference tags on every entry. Entry format captures decision, options rejected, rationale, date, session, cross-refs.	Complete — v1.0
Artifact #24 — Reading Tracker	Three-component architecture: PMD_Reading_Data.json data source, dedicated reading session protocol, spaced recall engine. Four book states including parallel. Four acquisition types with return deadline flags. Chapter-level schema with comprehension summary, application ideas with coach verdicts, phase connections. Seven-interval recall schedule (3-10-20-30-45-60-90 days). Pass advances interval, fail repeats at same interval. Bidirectional phase mapping. Returned-incomplete book handling with progress percentage. Dedicated reading sessions — separate from project sessions.	Complete — v1.0 approved
Artifact #25 — Phase Retrospective	Fires when phase project list is exhausted. Seven-section assessment: individual project assessment → phase bridge → competency check → skills tracker cross-reference → confidence score trajectory → coaching calibration review → forward look with locked decision (proceed / bridge / revise). Self-correction loop — phase can extend and retro re-fires. Locked decision recorded in both retro PDF and PMD_DECISION_LOG.md with cross-references.	Complete — v1.0 approved
Artifact #26 — Portfolio Readiness Assessment	Separate artifact from Phase Retro. Fires before every Portfolio Project begins — before Kickoff Protocol. Five-gate assessment: Skills Tracker evidence → PM process depth → confidence score floor (phase-calibrated thresholds) → evaluator standard check → honest self-assessment. Gate-specific remediation protocol. Ready verdict triggers Kickoff Protocol. Not Yet Ready verdict logged in PMD_DECISION_LOG.md.	Complete — v1.0 approved
Portfolio Project placement decision	Portfolio Projects sit inside phases — approximately two-thirds through. Not after phase close, not the last project in a phase. Keeps motivation continuous vs homework-then-exam dynamic. Portfolio Readiness Assessment gates entry. Phase Retro evaluates phase after Portfolio Project is included in the completed project list.	Decision locked

Two locked standards updated	(1) American English enforced across all documentation and artifacts — color not colour, behavior not behaviour, etc. (2) PDF table column headers sized to avoid mid-word wrapping — headers break only between words.	Active immediately
Bootcamp context captured	Up Coast Leaders 'From Passion to Product' — 6-week app strategy cohort. June 1 – July 6 2026. Mon/Wed 5:30–8:00pm PST. 8–12 hours/week. Free. Abbey Jackson (instructor) — former Intel/Mastercard/Rivian engineer and PM. Full program detail captured for Session 10 discussion.	Context captured — Session 10 agenda

3 · Complete Artifact Inventory — All 26

Artifact #	Name	Session/Phase	Version	Status
1–16	P0 Artifacts — Problem Statement through Measure & Iterate Plan	P0 Phases 1–9	Various	Approved
17	PMD_SKILL.md — System Operating Manual	System	v1.2	Approved
18	Project Roadmap Architecture	Session 08	v2.1	Approved
19	Build-in-Public Content Strategy	Session 08	v1.0	Approved
20	Project Selection & Kickoff Protocol	Session 08	v1.1	Approved
21	Skills & Tools Tracker (.jsx React component)	Session 08	v1.0	Approved
22a	Resume — ATS Traditional (.pdf)	Session 08	v1.0	Pending data — deferred post-P1
22b	Resume — PMD Style (.pdf)	Session 08	v1.0	Pending data + white bg — deferred post-P1
23	Sentiment Journey Diary — System Spec & Data Schema	Session 09	v1.1	Approved
24	Reading Tracker — System Spec, Data Schema & Session Protocol	Session 09	v1.0	Approved
25	Phase Retrospective — Template, Assessment Protocol & Decision Framework	Session 09	v1.0	Approved
26	Portfolio Readiness Assessment — Gate Protocol & Checklist	Session 09	v1.0	Approved

4 · Six System Additions — Final Status

Item	Addition	Artifact	Status
1	Project Selection & Kickoff Protocol	Artifact #20 v1.1	Complete
2a	Skills & Tools Tracker	Artifact #21 v1.0	Complete
2b	Living Resume — both formats	Artifacts #22a+#22b	Structure complete — data + 22b formatting deferred post-P1
3	Sentiment Journey Diary	Artifact #23 v1.1	Complete
4	System Decision Log	PMD_DECISION_LOG.m d v1.0	Complete
5	Reading Tracker	Artifact #24 v1.0	Complete
6	Phase Retro + Portfolio Readiness	Artifacts #25 + #26 v1.0	Complete — split into two separate artifacts

5 · Locked Decisions — Carry Forward

Decision	Detail
PDF table cell pattern	ALL cells wrapped in Paragraph via P() helper. VALIGN TOP. Header rows bold white with amber underline. Never plain strings.
American English	Enforced from Session 09 forward across all documentation and artifacts. Color, behavior, recognize, analyze.
Column header word-wrap	PDF table column headers sized to avoid mid-word wrapping. Headers break only between words or not at all.
WCAG 2.2 Level AA	Non-negotiable. FR-09. All portfolio projects. Never deferred.
Build approach	HTML/CSS/JS → React → Full-stack. Claude Code primary from P1 forward.
Draft-first protocol	Active from P1. User drafts key artifacts first. Coach critiques and refines second.
Kickoff protocol	5 steps before Phase 1 of every project. North Star Document locked first.
Portfolio Projects inside phases	Approximately two-thirds through a phase. Not after phase close. Not the last project in a phase.
Phase Retro trigger	Fires when phase project list is exhausted. Self-correction loop — can extend phase and re-fire.
Portfolio Readiness Assessment	Fires before Kickoff Protocol for every Portfolio Project. All five gates must pass.

Decision Log — dual recording	Phase Retro locked decisions recorded in both retro PDF and PMD_DECISION_LOG.md with cross-references.
Recall schedule	Reading Tracker: 3-10-20-30-45-60-90 day intervals. Pass advances. Fail repeats at same interval.
Reading sessions dedicated	Separate from project sessions. Global applicability. Cross-reference via phase_connections[].
Content strategy	Tier 1 every project. Tier 2 every phase group close. Tier 3 every portfolio milestone.
Full launch trigger	P0 v2 complete + 3 portfolio projects live. Hard deadline: 180 days from May 2026.
Confidence score	Current: 1.0/10. Target post-P1: 4–5/10. Scored honestly, not aspirationally.

6 · Session 10 — Agenda

Session 10 is a context and strategy session before P1 Kickoff fires. It will surface revenue-generating project ideas and bootcamp alignment decisions that may influence P1 selection, future Portfolio Project choices, and the currently proposed Project Roadmap. P1 Kickoff does not begin until Session 10 is complete.

Item	Description	Priority
Revenue-generating project ideas	User will share candidate project ideas with commercial potential. Evaluate each for: roadmap fit, phase appropriateness, portfolio vs learning classification, and alignment with full launch trigger goals. May add to or resequence the Project Roadmap.	High
Bootcamp alignment — Up Coast Leaders	'From Passion to Product: The Complete App Strategy Course.' June 1 – July 6 2026. Mon/Wed 5:30–8:00pm PST. 8–12 hrs/week. Free. Instructor: Abbey Jackson. User needs a project to shepherd through the bootcamp process. Determine: does the bootcamp project come from the existing roadmap, or is it new? Ensure chosen project aligns with and complements the PMD development roadmap. Bootcamp covers: user research, market validation, competitive analysis, solution shaping, feature roadmap, platform/tech stack decisions, launch and go-to-market strategy.	High
Roadmap impact assessment	After revenue ideas and bootcamp project are identified: assess combined impact on Project Roadmap Architecture (Artifact #18 v2.1). Update roadmap if sequencing changes. Lock decisions in PMD_DECISION_LOG.md.	High
P1 Kickoff — Step 1	If all Session 10 agenda items are complete and roadmap is settled: run five-step Kickoff Protocol. Coach delivers Project Context Brief. Ignition prompt fires.	Queued — after Session 10 complete

7 · Bootcamp Reference — Up Coast Leaders

Field	Detail
Program name	From Passion to Product: The Complete App Strategy Course
Provider	Up Coast Leaders / Up Coast Digital Products, Inc.
Instructor	Abbey Jackson — former Mobile Engineer (Intel), Mobile Lead (Mastercard), Staff Engineer + Sr. PM (Rivian). Patent holder.
Dates	June 1 – July 6, 2026. Monday and Wednesday evenings, 5:30–8:00pm PST.
Commitment	8–12 hours per week for 6 weeks. 9 live classes (2.5 hours each). 3 drop-in support sessions.
Cost	Free. Optional paid add-ons (Homework Club, recordings). No income share agreement.
Week 1	Setting the Stage — solve real problems that matter. Online research. User needs foundation.
Week 2	Understand the Landscape — survey solutions, user interviews, what people actually need.
Week 3	Size Up the Competition — competitive analysis, market positioning, where competitors fall short.
Week 4	Shape the Solution — transform research into product ideas, define purpose, identify viable direction.
Week 5	Build the Right Solution — scope product, prioritize feature roadmap, platform and tech stack decisions.
Week 6	Going Live — launch planning, app store presence, go-to-market strategy, post-launch growth.
URL	https://upcoastleaders.ca/n/app-strategy/course
PMD alignment	Maps strongly to PMD Phases 1–8. Bootcamp project needs to be identified in Session 10 and confirmed as either an existing roadmap project or a new addition. WCAG and CI/CD standards apply if project is Portfolio-classified.

8 · Open Items — All Active

Item	Detail	When	Priority
docs/current/ population	File Artifacts #23 v1.1 through #26 and Session 09 Summary to docs/current/. Move prior versions to docs/archive/.	Before P1	High
NOTES.md update	Update repository NOTES.md with all Session 09 completions and open items.	Before P1	Medium
PMD_Sentiment_Data.json — seed	Create and populate with P0 entry using v1.1 schema. Commit to repo root.	Before P1	High

PMD_Reading_Data.json — create	Create empty file with schema_version 1.0 and empty books array. Commit to repo root. Populate BOOK-001 when first book is selected.	Before P1	Medium
Resume 22a + 22b	Formatting and personal data deferred. Revisit after P1 completes.	Post-P1	Low
Clarity–GA4 connection	Connect Microsoft Clarity property to GA4 for combined reporting.	Ongoing	Medium
Footer email	Replace hello@thepmdev.com placeholder after Google Workspace setup.	Before evaluator sharing	Medium
Session 10	Revenue-generating project ideas + bootcamp alignment + roadmap impact assessment. P1 Kickoff queued after Session 10 complete.	Next session	High

9 · Resume Prompt — Paste at Start of Session 10

Copy everything between the dashed lines below and paste it as your opening message in the new chat. Attach PMD_Session09_Summary_v1.0.pdf and PMD_SKILL.md to that message.

I am continuing my PMD coaching journey. I have attached: PMD_Session09_Summary_v1.0.pdf and PMD_SKILL.md for context.

Please confirm full context before we begin:

IDENTITY

System: PMD. Pseudonym: PM Dev. Statement: Where brilliant ideas become shipped products.
Live URL: <https://thepmdev.com/>

P0 STATUS

All 9 phases complete. All 16 P0 artifacts approved. P0 officially signed off.
GA4 live. Clarity installed. WCAG 2.2 AA confirmed. 1280px + 1440px passed.

SESSION 09 COMPLETED

Artifact #23 v1.1: Sentiment Journey Diary — six schema corrections applied after coach review.

PMD_DECISION_LOG.md v1.0: System Decision Log — 6 categories, 19 founding entries.

Artifact #24 v1.0: Reading Tracker — 7-interval recall, 4 acquisition types, bidirectional phase mapping.

Artifact #25 v1.0: Phase Retrospective — 7-section assessment, self-correction loop, dual Decision Log recording.

Artifact #26 v1.0: Portfolio Readiness Assessment — 5-gate protocol, fires before Kickoff Protocol. Portfolio Projects: locked inside phases, approx. two-thirds through, not last project.

American English: enforced from Session 09 forward across all artifacts.

Column header word-wrap: headers sized to avoid mid-word breaks.

SIX SYSTEM ADDITIONS — ALL COMPLETE

Item 1 (Kickoff Protocol): COMPLETE

Item 2a (Skills Tracker): COMPLETE

Item 2b (Living Resume): Structure complete — data + formatting deferred post-P1

Item 3 (Sentiment Journey Diary): COMPLETE — v1.1

Item 4 (System Decision Log): COMPLETE

Item 5 (Reading Tracker): COMPLETE

Item 6 (Phase Retro + Portfolio Readiness): COMPLETE – split into Artifacts #25 + #26

SESSION 10 AGENDA – IN ORDER

1. Revenue-generating project ideas – user will share candidates for evaluation and roadmap fit.

2. Bootcamp alignment – Up Coast Leaders 'From Passion to Product' – June 1-July 6 2026.

Identify the bootcamp project: existing roadmap project or new addition.

Confirm alignment with PMD development roadmap.

3. Roadmap impact assessment – update Artifact #18 if sequencing changes.

4. P1 Kickoff – five-step Kickoff Protocol – after Session 10 agenda complete.

BOOTCAMP CONTEXT

Program: From Passion to Product – The Complete App Strategy Course.

Provider: Up Coast Leaders. Instructor: Abbey Jackson.

Dates: June 1 - July 6 2026. Mon/Wed 5:30-8:00pm PST.

Commitment: 8-12 hours/week for 6 weeks. 9 live classes. Free.

Covers: user research, competitive analysis, solution shaping, feature roadmap, platform/tech stack, launch strategy. Maps to PMD Phases 1-8.

URL: <https://upcoastleaders.ca/n/app-strategy/course>

LOCKED PATTERNS

PDF table cells: always P() helper. VALIGN TOP. Never plain strings.

American English: enforced. Color, behavior, analyze.

Column headers: no mid-word wrapping.

WCAG 2.2 AA: non-negotiable. All projects.

Kickoff protocol: 5 steps before Phase 1 of every project.

Portfolio Projects: inside phases, approx. two-thirds through.

Draft-first: active from P1.

CONFIDENCE SCORE: 1.0 / 10 (honest – no new project shipped yet)

Attach PMD_Session09_Summary_v1.0.pdf and PMD_SKILL.md to the new chat message.
